# New Hampshire Retirement System (NHRS)

#### **Mission Statement**

The New Hampshire Retirement System's mission is to provide comprehensive pension plan services for the benefit of its members and employers.

#### NHRS has two core businesses:

- > Provide member retirement services.
- > Invest retirement funds.

# NHRS has three broad goals surrounding its core businesses:

- ➤ Build a foundation to support measurable improvement in member and employer services.
- Develop and implement best practices, policies, procedures and standards in investment, financial reporting, administration, operations and plan governance.
- > Build a learning organization.

Dear Trustees,

We are pleased to present the Board of Trustees with a draft of the New Hampshire Retirement System (NHRS) Three-Year Strategic Plan for Plan Years 2005-2008.

As our NHRS team prepares for the challenges of a growing retirement-eligible population, rising demand for pension plan information, and increasing trust fund assets and complexity, we must collaboratively seek new ways to realistically and successfully accomplish organizational goals and objectives. In order to achieve our goals, it will require streamlining business processes, revising and improving workflow, strengthening internal controls, and building a solid foundation on which to improve services to our members and more effectively meet our statutory obligations and fiduciary responsibilities. Delegating responsibilities prudently and establishing appropriate monitoring processes will help to ensure that we can meet these challenges.

The focus of the NHRS team approach to the Strategic Plan has been to develop SMART goals (specific, measurable, achievable, relevant, time-oriented goals), which integrate various functional areas of NHRS into more cohesive operations. All NHRS staff members have actively participated in the strategic planning process (please refer to Addendum 3). Their technical experience, knowledge, perspective and input have been instrumental in developing a learning organization based on realistic goal-setting. The role of management has been to serve as team leaders, who have facilitated the development of the strategic plan by providing guidance and direction, establishing structure and timeframes, and coordinating team-driven work sessions which have shaped the plan.

The Strategic Plan is a "living document"; it is a work in progress involving all staff members in revisiting goals and responsibilities with a focus on effective strategy and planning. The Strategic Plan establishes a formalized communication process among all levels of staff and includes not only team operational goals and objectives, but also individual performance plans to help us achieve NHRS' vision.

The NHRS team is eager to move forward with strategic priorities that promote a progressive work environment encompassing a strong team ethic, collaborative problem-solving and a mission-driven philosophy.

Respectfully submitted,

Red Leggess

Robert Leggett Executive Director

#### **Investments**

The Investments staff is responsible for the administration of a broadly diversified investment portfolio consisting of domestic and international equity and fixed income as well as alternative investments and commercial real estate. The investment program objective is to consistently achieve above-average total fund return at a moderate level of risk. This is accomplished by implementing best investment and corporate governance practices, consistent with Board of Trustees policies and industry standards.

#### **Investment Management and Monitoring**

Investment Management and Monitoring are key functions performed by the staff. This involves managing asset allocation; coordinating the administration of investment portfolios; monitoring risk and performance; ensuring portfolio compliance with the investment and proxy voting guidelines; facilitating manager searches; performing asset transfers; and achieving reporting standards.

#### **Fund and Actuarial Administration**

The focus of Fund and Actuarial Administration is to pursue disciplined actuarial policies, procedures and practices to maintain and further improve the funding ratio of the plan. This important objective is achieved by conducting biennial actuarial valuations, experience studies, periodic reviews of asset liability management, and by monitoring plan funding progress.

#### **Member Services**

Member Services, comprised of the Benefits Team and Annuity Team, supports members' service needs by providing individual benefit information and counseling to members; tracking and verifying salary, contribution and service credit data; processing refunds and service credit purchases; certifying benefits; and issuing monthly annuity payments. To effectively deliver excellent member services, Member Services must monitor and increase baseline knowledge of federal and state legislative mandates covering a wide range of pension-related topics and tax-related matters.

#### **Annuity**

Annuity administers post-retirement benefits, which includes issuing monthly annuity benefits and cost of living allowances; managing the 401(h) medical subsidy; coordinating healthcare benefits with employers; implementing direct deposits; applying federal income tax regulations; and auditing retiree records to ensure that benefits meet state and federal compliance.

#### **Member Benefits**

Member Benefits (which includes Member Accounting, Enrollment and Record Retention) provides preretirement counseling and benefit estimates; processes retirement applications, disability claims and death benefits; manages prior service credit purchases; calculates and certifies benefit amounts; administers additional annuities; and audits member records and benefits to ensure state and federal statutory compliance.

#### **Business & Accounting**

Business & Accounting ensures that the organization's operational functionality is efficiently maintained by overseeing building administration, budget and procurement, pension fund accounting, financial reporting and employer reporting services.

#### **Building Administration, Budget and Procurement**

Building Administration, Budget and Procurement comprise many of the daily core business functions of NHRS. One of its primary objectives is to ensure that NHRS staff and the membership it serves are provided a secure, "user friendly" environment to operate in. Additionally, overseeing the processes for budgeting and procurement, including the training of NHRS staff in these processes, ensures that the necessary resources will be available to adequately maintain NHRS operations.

#### **Employer Reporting Services (ERS)**

ERS oversees all employer reporting functions including the processing of monthly wages and contribution reports, recording of payments accompanying the reports, and employer reporting oversight. ERS assists with employer education and training.

#### **Pension Fund Accounting & Financial Reporting**

Pension Fund Accounting & Financial Reporting provides information regarding the financial condition of NHRS to external entities via its publication of the NHRS Comprehensive Annual Financial Report (CAFR). The team also oversees the daily financial operations and accounting systems that compile the information necessary to produce the CAFR and to inform the Board Trustees on the financial condition of NHRS.
